Active wireless subwoofer to complement the soundbar

## The subwoofer: invisible power.

The round and pleasing 360° design allows to place the wireless subwoofer almost anywhere. Its powerful and controlled low-frequency sound spreads evenly and non-localisable throughout the room – without disturbing the neighbours with structure-borne noise: Thanks to the clever design with a precisely balanced, mirrored construction in hexagonal arrangement, it always remains outwardly vibration-free at peace in itself.

## Elegance and perfection in every detail.

A lacquered stainless steel plate covers the top of the subwoofer and simultaneously dampens any interfering stimulus through its sheer mass. The special two-yarn woven and robust acoustic fabric creates a vivid visual plasticity. The power connection and level control are unobtrusive located on the bottom and rear panels. The Loewe system colour basalt grey and the typical Loewe signature flag round off the harmonious 360° design.

## Bigger inside than outside.

The active subwoofer delivers a total music output of 360 watts and has in total of more than 1.000 cm<sup>2</sup> of effective membrane surface from 2 active 6-inch drivers and 4 passive radiators. This means it can easily play down to 35 Hertz low frequency and offers an astonishingly impressive bass foundation in the home cinema. The Loewe Wireless Digital Audio Link 2.0 ensures lossless and latency-free signal transmission.
